

NATIONAL LEVEL SYMPOSIUM ON MMPI-2 RF

(Organized by Psychology Research Unit, Indian Statistical Institute, Kolkata, January, 2020)

Background: The Minnesota Multi-phasic Personality Inventory-2 (Restructured Form) is a broad- spectrum inventory, the result of a data-based and construct-oriented revision of the MMPI-2. The goal behind this development was to build a comprehensive set of scales yielding an efficient and exhaustive assessment of salient and clinically relevant variables. This broadband instrument is used in a variety of settings. The aim of this symposium is to provide a sphere to understand the various intricacies of this tool and also explore its uses as a tool for clinical research.

CALL FOR PAPERS

Abstract submission: 350-400 words,
with author and co-author details,

Submission email:
dmpr2017@gmail.com

Last day for submission: 17th
December, 2019.

Final Confirmation by email by 26th
December, 2019 (after selection by
Academic Committee)
